ANCA

With a story that is rooted in a history of elegance and embraced with the soul of an artist, ANCA blends diverse influences and cultures to create timeless bespoke furniture. The brand celebrates a passion for excellence in design, functionality and craft. Backed by over three decades of creating beautiful spaces and products, this luxury furniture brand creates unique pieces including tailor-made furniture, cabinets, panels, wooden vanities, wardrobes, doors, boiserie, as well as soft furnishings. At ID Collective 2021, they launched a new collection, Reverie, which is inspired from the state of contemplation, creating mystical living experiences. It's a blend

of soft classic and contemporary elements with muted and neutral hues. The living room is a fusion of contemporary forms with hints of neoclassical details. The upholstered sofas feature oak veneer details and champagne leafing while coffee and end tables are stylized with bent glass wrap and leather cladding. The bedroom is created with soft classic nuances that projects a relaxed and calm space. The wood grooving detail on the chair, wardrobe shutter and tv unit is a key element of the space. The walls of the dining area are dressed in lacquer wall panels and a wallpaper featuring a bold print with soft texture.
